Significant National Weather

West: Dry and stable weather is expected today.

Midwest: A storm is moving across Wisconsin, Illinois, Michigan and Indiana bringing rain and snow.

South: Rain and thunderstorms are expected over portions of the Lower Mississippi and Tennessee Valleys and into the Central and Southern Appalachian Range.

Northeast: Portions of eastern New England will experience strong winds and heavy rain.

Tropical Activity: There is no activity affecting U.S. territories.

Tornado Weather: There is a 2 percent chance of tornado activity in portions of southern Illinois, western Kentucky, and southeastern Missouri.

Significant Flood Outlook: There is significant river flooding occurring or likely to occur from the upper Mississippi Valley through Michigan. Flooding is also occurring in portions of North Dakota.

Critical Fire Weather: Critical Fire Weather is forecast for portions of California, Nevada, and Arizona.

Report of Incident Notifications

There were 31 epaossc.org websites created and/or updated during this reporting period (4/22/13– 4/23/13).

Floating Fuel Tank, Henry, IL. On April 21 the National Response Center (NRC) was notified of a fuel tank floating down the Illinois River near Henry, IL. The local fire department was able to secure the tank to a tree near mile marker 196 and verified all the tank valves were closed. The Marshall County EMA Director and the USCG asked EPA for assistance. Region 5 dispatched an OSC to the site.

Exercises / Pre-Deployments

Nothing to report.

Regional Daily Ops Status Report

Reported activities primarily represent NRC notifications with some state-level and other notifications to Regional Phone Duty Officers.
